

STIJN SAGAERT

PROFILE

Analytical, curious, and with a **practical** mindset are some of my key traits. Driven by my **eagerness to learn**, I strive to improve with every project. I have extensive experience as a PHP and Full Stack Developer and am open to roles as a Full Stack, PHP, or Vue developer.

EXPERIENCE

PARETEUM, FULL STACK DEVELOPER

Brugge | 2023- 2025

- **Migrated and refactored** critical functionalities from a legacy **CodeIgniter** application to a modern **Laravel platform**, which improved maintainability and performance.
- Implemented a test suite with **PHPUnit** for the core business logic, which **increased code stability**.
- Developed a **mock server** (Spotlight/Pulse) that simulated a live **OpenAPI** specification, allowing front-end development to proceed independently of the back-end.
- Translated functional specifications into detailed technical designs and implemented these features in an **Agile/Scrum** environment in collaboration with QA.
- Led the successful **upgrade** of the entire codebase from **PHP 7.4 to 8.2**, including resolving breaking changes.

EFFIX, FULL STACK DEVELOPER

Waregem | 2022- 2023

- **Optimized** a data import script (linked to Odoo APIs), drastically **reducing a 10-minute processing time to just 30 seconds**.
- Developed and integrated new e-commerce functionalities in the front-end using **Vue.js** and **Vuex** for state management.
- Contributed to the development of the **GraphQL API** layer to enable more efficient data exchange between the **Laravel back-end** and **Vue.js front-end**.
- Maintained and further developed the **gRPC communication** between microservices.

INDIEGROUP, MAGENTO/PHP DEVELOPER

Kortrijk | 2017 - 2020

- Built a robust **PHP pipeline** for the automated import and processing of CSV product data in **Akeneo (PIM)**.
- Responsible for the **continuous development, maintenance, and technical support** of multiple **Magento 1 and Magento 2** websites, from implementing new features to resolving client issues.
- Provided **technical support** to clients by analyzing and resolving issues via a ticketing system (e.g., JIRA) and direct contact.
- Analyzed and optimized complex **MySQL queries**, resulting in significantly **improved load times** for a legacy project, and integrated a bulk email service.
- Managed the technical upgrade of projects from PHP 5.3 to 7.4.
- **Certificaat:** Gecertificeerde Magento Developer Certificate
